Fresno State nursing students are teaming up with The Sleeping Bag Project of Fresno to bring awareness to students about the homeless community by holding a donation drive on campus through Friday, Nov. 18.

Each semester, Fresno State nursing students participate in a project to help an area of need in the Fresno community. This semester a group of nursing students are helping to promote “The Sleeping Bag Project” donation drive as their project.

“They are to find and meet one identifiable need in the community,” professor of community health nursing Dr. Ndidi Griffin said. “They collaborate with that agency to make sure they identify a legitimate need and based on that, they design a project.”

The Sleeping Bag Project of Fresno is a non-profit, volunteer effort sponsored by the Fresno Rice College Foundation. Their mission is to provide sleeping bags and blankets to the homeless during the winter months.

“Homeless people are outside 24 hours a day until the cold season ends,” said Sumagang. “Our goal is to decrease the health issues they would encounter from their old sleeping bags and blankets. Fresno State nursing student Jurlen Sumagang said.”

While the donation drive is primarily focused on collecting gently used sleeping bags and blankets, Fresno State student nurse Kristen Collier said they would accept other donations.

“We’re not opposed to other donations and we’re always on the lookout for a donation that is going to provide warmth,” Collier said.

Griffin explained the nursing students will benefit from the project both personally and professionally.

“These students will have just one more semester before they graduate and I think this experience will go out with them throughout their entire career,” Griffin said. “They typically come back in awe and they are no longer sheltered to the needs of the community.”

For these nursing students, the donation drive is more than just a class project, it is a way of giving back.

“The academic affairs budget advisory task force has recommended the number of colleges at Fresno State be reduced from eight to seven or possibly six,” said Platt.

Of the very real and pervasive problem of the national debt:

“I lived on the streets. It was cold,” Greenwood said. “I lived in Colorado,” Greenwood said. “I was lucky enough to get into a shelter and then once for four months when I lived in Colorado,” Greenwood said.

“(Their) experience stems from personal experience.”

“I was homeless twice in my life,” Garcia said. “Once for four months in New York City where I was lucky enough to get into a shelter and once for four months when I lived in Colorado,” Greenwood said. “I lived on the streets.”

Professor Griffin also explained that the project helps nursing students develop professional careers and responsibilities that accompany the profession.

Veterans fraternity addresses veteran needs

By Alexandria Garcia  The Collegian

Fresno State student veterans founded the first veterans fraternity at Fresno State to help other student veterans’ integration into civilian life and to supplement services not provided by Fresno State. Omega Delta Sigma is the first veterans fraternity in the western region and United States.

Last spring semester, a colony of the National Veterans Fraternity was established at Fresno State. Omega Delta Sigma was founded by Jurnel Sumagang, a nursing student and a U.S. Marine Corps veteran who noticed a lack of resources available to student veterans at Fresno State.

On campus there are a lot of different organizations for civilians. But for veterans, how many resources can you see?” Sumagang said. “The real purpose of the fraternity is to add additional resources for veterans because the university only had one option: to join the student veterans club.”

Sumagang was previously the president of the Student Veterans Organization, a club on campus also stemmed from a national organization, Student Veterans of America.

Nursing major and current president of Omega Delta Sigma, Anthony Graves, served in the U.S. Army for three years. His first experiences at Fresno State were not what he imagined.

“‘Modern Warfare 3’ is as advertised

By Johnathan Wilbanks  The Collegian

The Academic Affairs Budget Advisory Task Force has recommended the number of colleges at Fresno State be reduced from eight to seven or possibly six. The Oct. 26 report recommended a program consolidation and reorganization of schools and colleges in order to reduce administrative costs for Fresno State.

This reorganization has angered many Fresno State students as the proposed plan involves moving the College of Science and mathematics under the College of Agricultural Sciences. “I think a merger would be a huge problem and would backfire almost immediately because they are planning on moving most of the sciences under a department that would both be overworked by having four or five more departments under it, and may not appreciate that the sciences are expensive.” Fresno State geology student Bryant Platt said.

The administrative costs would be reduced by approximately $250,000 by the reorganization, but students continue to oppose the change. Platt said a possible problem with this plan is that it would be much more difficult for professors and students to get grants for research.

“If we are trying to go to graduate or medical school and we don’t have the proper training in our under-graduate schooling, we are not going to be admitted,” Platt added. “If we were, a lot of the faculty will not be able to get more grant money easily, and we have the potential to lose a lot more than the $300,000 we would save.”

The task force identified a gap of $1.7 million to $2 million for the 2011-12 school year. Its report outlined shortcomings with the “Level B” allocation model, which was reportedly not responsive enough to the major budget cuts Fresno State is currently facing. The task force also came to the conclusion that the budget does not allow for enrollment growth and is complex enough to limit transparency and make it ineffective in estimating how enrollment decisions will impact financing.

A survey of student opinion regarding the merger was put together by chemistry department professors and distributed by the Biology Club and other on-campus organizations. The results are set to come out this week.

NURSING: Students collect for a cause

CONTINUED from page 1

“It’s a way of demonstrating the fact that they actually care what happens to other people. It’s a part of their role as a nurse to care for other people,” Griffin said.

Student nurse Patricia Saulog said the donation drive is a way for Fresno State students to get involved in the community this holiday season.

“This would be a great way to share our blessings with others and to not only provide physical but emotional warmth during the holidays,” Saulog said. “Our general goal is to get as many [sleeping] bags and blankets as possible to donate before the holidays.”

The Sleeping Bag Project is presented by the Fresno State Chapter of the California Nursing Student Association. Drop boxes are located in the Nursing Resource Center, McLane 183 and the Smittcamp office, McLane 200. Donations can be dropped off until Nov. 18.

CUTS: Fresno State may reduce number of departments

CONTINUED from page 1

future dentists and pharma- ceutics from coming to Fresno State, pre-dental student Mark Mathies said.

This proposal is attempting to cut out the superfluous options, emphases and minors. They are also trying to cut out redundancies in the curriculum with a proposed consolidation of lower-division statistics classes into a single department. Streamlining like this could potentially save Fresno State $100,000. The effect of these reforms on the quality of education is not yet known.

“The pursuit of science is integral to the understanding of the world. I think that a basic understanding of the sciences is crucial for the advancement of society as a whole,” chemistry, biology and philosophy major Jeff Cole said in a written statement.

“We are now faced with a point of regression concerning the future of the science and math departments. When humanity stops reaching out toward the unknown, we stop evolving,” Cole added.

VETERANS: Fraternity provides veteran support

CONTINUED from page 1

Fraternity would provide a brotherhood that the club could not. We wanted a sense of camaraderie and brotherhood like we had in the military,” Sumagang said. “Finally, we were referred to Wendy White and she could see our purpose, stepped up to the plate and is our advisor today.”

White, an educational TRIO professional with the Educational Talent Search at Fresno State, is also a veteran. She received her commission from the Fresno State Army ROTC program and served in the California Army National Guard as a transportation officer from 1996 to 2002.

“They [veterans] are not the typical college student and this opportunity of networking through the fraternity will help them navigate through the college experience,” White said. “They served their country and now they want to make the transition and hopefully get their degree and have a successful career.”

The fraternity’s mission follows that of the National Veterans Fraternity where “gallantry and camaraderie during military service is the foundation for this collegiate brotherhood.”

“We founded the fraternity because we recognized that there was a lack of the brotherhood that is very prevalent in all the military services,” Graves said. “The main goal is to create a community of veterans within the Fresno State collegiate arena to be able to connect them and be able to support each other when they are facing difficulties.”

Graves added that student-veterans face more struggles than the typical college student and therefore have different needs. The fraternity is striving to ensure these needs are met and is currently in the process of recruiting five members in an effort to build its community and support system.

Sumagang, who is now president of the United Sorority Fraternity Council (USFC) is proud that he has helped create the fraternity, “It’s a brotherhood,” Sumagang said. “It’s a fraternity, but with a fraternity you have to pick whichever organization you want and now we have options and we continue to work on those options more and more.” Sumagang said.

Graves senses validation of the fraternity’s establishment through the fact that its members have already started to rely on each other.

“We want to make sure that there is no veteran left that feels alone and we want to make sure they know that we are here for community, support and for brotherhood,” Graves said. “We have created a community of brotherhood and support that wasn’t there before.”

Fresno State student-veteran Devon Stevens is also a member of the fraternity. She received her commission from the Fresno State Army ROTC program and served at Porterville City College and notes the difference between a club and a fraternity.

“With a club, you don’t have to be there. It is not mandatory, but with a fraternity you know everyone is dedicated and committed,” Mathis said. “It’s a brotherhood, these guys have my back and I have theirs.”

“When you’re in [the military], you have ‘Battle Buddies.’ These guys, my brothers, are my ‘College Battle Buddies,” Mathis said.

'Call of Duty: Modern Warfare 3,' the newest and greatest edition to the COD series

By Dylan Patton
The Collegian

"Call of Duty: Modern Warfare 2" was a great game. It had some impressive graphics and a gripping storyline. A terrorist, Vladimir Makarov, executed a terrible act of violence and managed to frame the U.S. for the action. Russia then declared war on the U.S. A few brave soldiers stood up and tried to stop the war. However, the cliff-hanger ending left a lot of gamers frustrated.

"Call of Duty: Black Ops" was released, but still questions remained unanswered. Where is Vladimir Makarov? When do I get to kill that guy? Well now the wait is over. "Call of Duty: Modern Warfare 3," the latest installment, answers all question you may have had that were previously left unanswered.

Russia has not continued its war on the U.S., but has now declared war on Germany, London and France. As armed forces from all over the world are fighting back, Captain Price and his friend and partner "Soap" McTavish are looking for terrorist Vladimir Makarov.

Like most COD games, you switch between and fight alongside many characters. These include U.S. Delta Force soldiers, "Sandman," and "Frost." SAS (Special Air Service) troops, as well as Price and Soap. The campaign missions will send players across the globe. You start in New York, from there you go to India, Africa, Germany, London and finally the Arabian Peninsula.

The missions are intense. The first mission has you fighting through the streets of New York. From there you make your way to the Stock Exchange.

Later, you’ll find yourself boarding then escaping from a submarine. In later missions, you’ll find yourself manning a fully armed drone, gunning down enemies with a gatling gun aboard a helicopter and using an underwater craft.

As you fight through the campaign, you find yourself closer and closer to getting Makarov. Will you finally be able to bring this terrorist to justice? Will the war with Russia end in peace? Or will evil prevail?

The multi-player option has been improved with a few tweaks. The kill streaks are back, but some new ones added. You can now call in five attack helicopters. You can now use a remote controlled drone that acts as a permanent marker. Another drone is equipped with a mini-gun and grenade launcher. There are now two different styles of kill streaks, "attack" and "support." "Attack" focuses more on rewarding players for achieving kills without dying, and "support" keeps your kill-streak going even after you die and awards you for the total number of kills.

The "Spec-Ops" mode has returned. There is a new mode, similar to "HALO-Reach" Firefight mode. In this mode, you earn experience points that you can use to buy better equipment to help you fend off the endless waves of enemies. Having a second player will definitely help you with this mode. This mode will also help sharpen your FPS (first person shooter) combat skills.

Sledgehammer games took the reins from Infinity War, which designed "Modern Warfare" 1 and 2. Sledgehammer took the same style of the previous games and polished to add some incredible realistic detail. The guns sound more realistic. The buildings, the landscapes look so realistic, you’ll swear you’re on the actual battlefield.

"Call of Duty" has always provided one heck of a gaming experience. "MW3" is no exception. Awesome graphics provide excellent backdrops during the campaign mode. The story may be the typical take down of the evil bad guy, but the ending felt fulfilling and happy. Improvements to the multi-player option will please multi-player fans. If you’re a fan of FPS games, "MW3" will not let you down. If you’re not a fan, give this one a shot. You won’t be sorry.

Patrick Stump finds life beyond Fall Out Boy

By Greg Kot

McClatchy-Tribune

CHICAGO — It doesn’t take a musical genius to read between the notes of Patrick Stump’s first solo album, “Soul Punk” (Island), to realize that the Fall Out Boy singer and songwriter left a few things unsaid in his old band.

Whereas Fall Out Boy focused on pop-rock, blending Stump’s melodies with bassist Pete Wentz’s lyrics, to become one of the more successful bands of the last decade, “Soul Punk” draws heavily on 80’s dance-influenced pop and R&B. Stump not only played all the instruments on his debut, he wrote the lyrics – if nothing else, it marks a personal breakthrough for a multi-faceted musician and singer who often stood in Wentz’s shadow in Fall Out Boy.

When Fall Out Boy went on hiatus a couple of years ago, Stump got to indulge some of the musical interests he had to suppress. “I wasn’t necessarily frustrated in Fall Out Boy, but there were things that didn’t get satisfied, desires left wanting,” Stump says. “We didn’t all meet on the same kind of music. When bands break up, there are all these burn words that get tossed around to maintain a front for the audience, but in this case there literally were creative differences. (Fall Out Boy bassist Joe Throhman) is a metal head, a straight-up hard rocker. I’m sort of an R&B cat, a jazz guy. Pete (Wentz) is more interested in playing with words as a lyricist, almost beat poet, whereas my style is a lot more simplistic, minimalistic. There’s also a lot of folk story-telling influences in what I do — all the things the band wasn’t into.”

On the last Fall Out Boy album, the 2008 release “Folie a Deux,” Stump says the overblown sound was due in part to his desire to stretch the band’s framework. “I tried to sneak some things in there to see if anyone would catch it,” he says. “Like I’d throw in a second guitar track that would basically be funk. It ended up hurting the material, because we’d end up with these almost funny verses, with a normal rock-sounding chorus. It was kind of schizophrenic.”

The title of “Punk Soul” hints at a pull of opposites too. “I am genuinely into soul, R&B and hip-hop – all these genres that get slapped under the soul genre,” Stump says. “That spoke to me more than it did to my punk-rock friends. And punk spoke more to me than it did to my soul friends. I basically didn’t fit comfortably in either world. I thought that would be the most punk-rock thing you could do, to call a record ‘Soul Punk’ and not have it sound like the buzzcocks covering Otis Redding. To me it’s more about the spirit of it. Punk doesn’t mean Mohawks and safety pins. It’s about not conforming.”

Stump’s fascination with 80’s R&B and dance pop may surprise some Fall Out Boy fans. But he says it’s a part of his musical DNA. “Drums were my first instrument, my first love,” he says. “I need rhythm, something that moves. So people who were thinking I’d move more in a singer-songwriter direction with this, it’s not natural for me. Rhythm speaks more to me than a guy strumming a guitar.”

His first musical obsessions were from that early MTV era, and heotch of them even when he was playing in punk bands in Chicago’s all-ages scene as a teenager.

"Immortals, “superman,” and "J. Edgar" are just a few of the many new blockbusters that are hitting theaters this fall. But what makes these films so special? What is it that sets them apart from other movies? Is it the story? The acting? The special effects? Or is it something else entirely? In this quiz, we will test your knowledge of these films and see how much you really know about them. Ready to take the quiz? Good luck!
By Angel Moreno
The Collegian

It has been two weeks since the 'Dogs have hit the course and Fresno State is back in full-swing preparation for the spring season with interim head coach Alexis Edwards pushing her team to climb another 20 spots in the collegiate rankings during the fall season.

The Bulldogs are currently ranked 88th in Golfstat.com’s NCAA Division I rankings, a large jump since the start of the fall season. Edwards wants her team to match the improvement in the spring as well.

“I don’t think it should be a problem for the girls, but with their playing ability they should have no problem moving up 20 spots,” Edwards said. “With time, effort and practice it should be a nice, fair goal to achieve.”

And that goal isn’t unattainable as the 'Dogs earned two second-place finishes in the four tournaments they competed in during the fall. Fresno State finished second at the Rose City Collegiate Tournament and the Cowgirl Desert Intercollegiate, respectively.

The reason for the Bulldogs’ impressive finishes rest on senior Louisa Lies’ return this season was uncertain due to major knee surgery, but she has recovered fully and has taken charge of the 'Dogs on the green with a 75.75 scoring average after four tournaments.

Ly is a freshman from Clovis High School and the lone recruit for Fresno State, leading the team with a 74.92 scoring average. Edwards recognizes that Fresno State has been consistent in recent tournaments.

“Ly leads the team with a 74.92 scoring average after four tournaments. Edwards recognizes that Fresno State has been consistent in recent tournaments,” Edwards said. “They played very well and were confident,” Edwards said. “Heads held high throughout the event so it’s just keeping that momentum from those tournaments into the rest of the season.”

There is a lot for the ‘Dogs to build off of going into the spring season as they were relatively successful during the fall.

Edwards is confident in her team, but concerned that the players need to carry the momentum into the spring season. Edwards is confident in her team, but concerned that the players need to carry the momentum into the spring season.

“Ly played well and were confident,” Edwards said. "Heads held throughout the event so it’s just keeping that momentum from those tournaments into the rest of the season.”

There is a lot for the ‘Dogs to build off of going into the spring season as they were relatively successful during the fall.

Edwards is confident in her team, but concerned that the players need to carry the momentum into the spring season.

“The goal with golf is to figure out how you’re taking that momentum from one tournament, one round, or even one hole or one shot to everything else in the future. You have to practice your mental game too. As long as everyone is practicing and doing what they need to then the spring should be a success.”

Lies agreed with her coach that the first three tournaments were her best performances of the season, and she believes in her final outing at the Las Vegas Collegiate Showdown where she tied for 93rd place and shot a final score of 236 over three rounds.

Born and raised in Germany, Lies grew up around the game of golf and has become the team’s No. 1 player. She has led the ‘Dogs in scoring average in both her sophomore and junior seasons, as well as a second-place finish at the Western Athletic Conference Tournament during her freshman year. Lies was also named second-team All-WAC the past two seasons. Lies realizes that Fresno State’s play in the fall season could dictate how they fare in the spring.

“I think it’s very important to know what we’re capable of now,” Lies said. “That self-confidence you go into a tournament with, you have to keep that going. That’s the only way to win a tournament, if you don’t doubt yourself.”

Fresno State defensive coordinator steps down

By Collegian Staff

After giving up at least 41 points in losses for the third straight week, Fresno State football announced that defensive coordinator Randy Stewart has decided to step down effective immediately.

The Bulldogs traveled to New Mexico State over the weekend and were dropped in a shootout, 48-45, eliminating Fresno State’s chances of receiving a bowl bid.

On Sunday, Randy Stewart has decided to step down as defensive coordinator at Fresno State,” Pat Hill said in a statement. “Together, we looked at our defense over the past year and a half and he said we were making progress, but it was not going as we had hoped over the past four weeks and a change was needed.”

Fresno State currently ranks last in the Western Athletic Conference in scoring defense, giving up an average of 37.1 points per game. The Bulldogs also rank 103 out of 120 Football Bowl Subdivision teams in total defense.

“Randy will remain an assistant coach for the remainder of the season as we look to improve our defense,” Hill said. “We appreciate everything he’s done for our program and wish him the best in the future.”

With the loss, Fresno State’s bowl chances were dashed for the first time since the 2006 season.

The ‘Dogs will hit the road again next week as they will make the trip to Hawaii to face the third-place team in the WAC.

Application Deadline: November 18, 2011

The 48-45 lead. Christian finished the game going 25 of 43 for 380 yards and two touchdown passes. The Rogers touchdown would prove to be enough as Fresno State was unable to put any more points on the board. The loss was Fresno State’s first against New Mexico State in the series between the two schools.

Latest loss pushes ‘Dogs out of bowl contention

Going into another Western Athletic Conference game against New Mexico State, Fresno State’s chances of making it to a bowl game were already very slim with losses against the top two teams in the conference in back-to-back weeks.

A couple weeks ago, the ‘Dogs lost a tough game at Nevada, 45-38, and last week were dropped by second-place Louisiana Tech, 41-21.

With two losses in the WAC already, there was a lot at stake in this week’s game against the Aggies as Fresno State needed to win out to have a chance at reaching a bowl game for the 12th time in Pat Hill’s Fresno State career.

Coming into the game, New Mexico State had shown marked improvement from last season as it had played two of the top teams close in Hawaii and Nevada. The Aggies lost to the Wolf Pack, 48-34, and to the Warriors, 49-34.

Although the Aggies lost these two WAC games, they have been in every conference game this season so it was expected that Fresno State would be in for a tough time.

New Mexico State started the game off fast with the help of former Bulldog Matt Christian. The senior found junior wide receiver Kenny Turner for a 29-yard pass to give the Aggies the early 7-0 lead.

Fresno State would answer back with sophomore quarterback Derek Carr leading the ‘Dogs down the field. The drive ended with junior running back Robbie Rouse finding the end zone from six yards out to tie up the score at seven apiece.

The Aggies got on the board again in the beginning of the second quarter with Christian driving New Mexico State down the field. Turner finished off the drive again with another touchdown, but this time it was on the ground with a one-yard touchdown run to give the Aggies the 14-0 lead.

The Aggies’ special teams also put some points on the board in the second quarter when Taveon Rogers shredded the Fresno State kick coverage to the tune of a 99-yard touchdown, giving New Mexico State a 20-10 lead.

With less than five minutes left in the first half, Carr led the Fresno State two-minute offense to perfection, marching the ‘Dogs down the field. Carr finished the drive off with a 20-yard touchdown pass to Rouse to cut the Aggie lead to 20-17. Carr finished the game going 22 of 34 for 391 yards and three touchdown passes.

After halftime, the game turned into a shootout starting with Carr bringing the deep ball back to the Fresno State. Sophomore wide receiver Jalen Saunders scored the first touchdown of the second half, but it wasn’t through the air. Saunders turned a 15-yard run to give Fresno State its first lead of the game, 24-20.

On the next drive, Carr found his go-to target Saunders for a 59-yard bomb to extend the lead to 31-23. Later in the quarter, Carr hit Saunders again this time it was of the 64-yard variety to give the ‘Dogs the lead back after the Aggies scored again, 38-31. Saunders finished the game with seven catches for 174 yards and two touchdowns.

New Mexico State answered back on the ensuing drive with Christian driving the Aggies down the field again. Turner would end the drive again with a six-yard touchdown run to tie the score 38-38 before the end of the third quarter.

In the final quarter the scoring slowed down a little, but Fresno State still found the end zone with a little over eight minutes left in the fourth quarter. Rouse would plop his way to pay dirt for a two-yard touchdown run to give the ‘Dogs 45-41 lead.
