Instructors see digital divide

Digital Campus representatives say online classes just as good

By Joe Bailey

The Digital Campus (DC) at Fresno State is designed to enrich courses by offering an online aspect to every course that uses Blackboard or other online resources, officials said.

With vast amounts of information available to students and faculty through the Internet, the director of Digital Campus, Brent Auernheimer, is in charge of making sure that everything runs as smoothly as possible.

"Digital Campus supports online teaching and learning," Auernheimer said. "From doing the technical system administration and configuration of Blackboard, to helping faculty develop online classes, to figuring out why students or faculty are having problems with Blackboard or other academic technology.

All of these services are in place to complement and enhance various learning styles.

"Universities in general are finding that their on-campus students are also their online students," Auernheimer said. "It also varies by discipline. Online works better for some more than others."

Auernheimer has seen the progression of DC at Fresno State since he came here in 1986 as a computer science professor.

"I’ve been interested in using technology for teaching and learning for a long time," Auernheimer said. "I really like hybrid classes where we meet half of the time in the classroom face to face, and the other half doing things online."

Lynda Harding, the former director of DC, said that some faculty members are reluctant to use DC.

"Many faculty members were reluctant to use DC, but now they are very satisfied," Harding said.

"Some faculty members said that it could be more difficult than doing it the conventional way," said Harding. "But I think that it will be even better than doing it the conventional way."

John Lor, an EOP counselor, said that some students are also their online mentors, and that they can always go talk to them.

The senior at Granite Hills High School said that she learned much on her own, and that she can always go talk to them.

"In high school, they pretty much lay out your controls, and somewhat [your] senses, by tardy bells and those kinds of things. Here you’re pretty much on your own," Olivares said.

Olivares said that it could be difficult for students to manage their time.

"In high school, they pretty much lay out your controls, and somewhat [your] senses, by tardy bells and those kinds of things. Here you’re pretty much on your own," Olivares said.

Olivares said that it could be very difficult to manage four three-credit classes when three hours of reading are expected per unit.

In defense of Fresno

By Maddie Shannon
The Collegian

O ver spring break, I had the opportunity to visit with all my high school friends who, unlike myself, went away to college. While I was there, I spoke with people I hadn’t seen in several months, I realized that few of them, if any, could understand what it feels like to live in a small town for school.

“There are no big city people,” they said. “(Insert big city here) is much more exciting than Fresno.”

When it comes to making the thing that makes a city exciting, I tend to agree. Considering museums, movie theaters, shopping centers and clubs, big cities like New York, San Francisco and Los Angeles have more than their fair share of excitement. But we Fresno kids have a few things bigger cities don’t.

For one, we have the mountains. We have a great view of the Sierra Nevadas (not every day I’ll admit), but we have a two-hour drive to the slopes, as opposed to larger cities which have to drive much longer to go snowboarding or hiking.

We have the Unified School District (CUSD). Yes, for those of us who grew up in Clovis Unified, it was more than a little frustrating to put up with the dress code and the seemingly endless amount of rules. But despite these frustrations, CUSD turns out the most well-prepared students of any public school district in the state.

According to a recent article in Fresno Magazine, 60 percent of Clovis Unified students go on to college, a considerably higher statistic than many other school districts in the state.

We also have Fresno State, a university that brings the entire city together over football games, Vintage Days and concerts at the Save Mart Center (Taylor Swift, anyone?).

The fact that we, as a school, are almost 100 years old speaks to our ability to stick out the tough times, times that even were harder than what we’re going through now. The Great Depression, two World Wars and the political and social turmoil of the ’60s and ’70s are all curvilinear to every American, including those who lived in Fresno. Fresno State stands strong through it all, and has continued to be an entity that the rest of the city rallied around.

We have the Fresno Grizzlies, another rallying point for the city. I grew up going to Grizzlies games every spring, and now that I’m in college, I just need to be more allusive and care-free, and do whatever it takes to not get slip, and it’s back to prison.

With this new law, some of these recently released violent criminals may come to the conclusion that they just need to be more allusive and care-free, and do whatever it takes to not get caught. Especially, when nobody will be watching.

According to a story from bnet.com, “fifty-six percent of violent felons are repeat offenders.”

If my math (which has been known to be questionable many times) is correct, slightly more than half of violent offenders either have or will repeat crimes.

The dunces in Sacramento need to figure out a different way to try to save money. Endangering citizens by letting felons out of prison without parole is not the way to do it. Criminals are not going to be on parole upon their release. California’s elected politicians should be as well.

COMMENT: The Collegian is a forum for student expression. http://collegian.csufresno.edu

P arole is an integral part of any criminal justice system. But, California decided to throw it out the window a few months ago. As it turns out, maybe that decision wasn’t the best idea. Sure, surprise parole was a good idea. Surprise parole was a good idea. California’s big mistake

Setting it Straight
DETON DUBBLES

tions is not following the letter of the law,” Lieu said. “They have a sex offender walking the streets without parole supervision. It must be their fault.” To be criticized on a penal code implementation that we didn’t create is not right and is not fair,” said Gordon Hinkle of the California Corrections Department.

For some reason, I was under the impression that we, the citizens, elect officials to govern our state with our best interests in mind. With this particular case, citizens’ lives are now being jeopardized because of this new law.

The new parole law is supposed to reduce the state prison population by 6,500, and save California $500 million in its first year. “That’s ridiculous. Basically, what’s happening is that some prisoners convicted of violent crimes are serving their sentences and are being released. Nobody will monitor them to make sure they are on their best behavior and become productive citizens.

Parole acts like an insurance policy. Recently released violent offenders move are watched under a microscope to make sure that they maintain a strict law-abiding lifestyle. Any little slip, and it’s back to prison.

With this new law, some of these recently released violent criminals may come to the conclusion that they just need to be more allusive and care-free, and do whatever it takes to not get caught. Especially, when nobody will be watching.

According to a story from bnet.com, “fifty-six percent of violent felons are repeat offenders.”

If my math (which has been known to be questionable many times) is correct, slightly more than half of violent offenders either have or will repeat crimes.

The dunces in Sacramento need to figure out a different way to try to save money. Endangering citizens by letting felons out of prison without parole is not the way to do it. Criminals are not going to be on parole upon their release. California’s elected politicians should be as well.

That’s what the people are saying

On presidential reading

White House watchers obsess over which aides have the ear of the president, but the books presidents read also offer insight on where they want to take the country—and how history will remember them.

—Tevi Troy, Washington Post

California's big mistake

The Collegian wins two CCMA first place awards

There’s always a time for a little shameless self-promotion. For us, that time is now. The Collegian won two first place California College Media Awards and 11 overall this week. (Including first place in the Editorial Division—congrats!) Congratulations students, you have an award-winning newspaper. Feel special.

Thumbs up Fresno Grizzlies win home opener

The 2-1 Grizzlies victory drew a crowd of 13,852, the third largest crowd in the history of the AAA squad. How nice to be able to watch players only a step away from seeing major league action. It is part of what makes Fresno so great (See left.)

Thumbs up Bill Clinton takes himself out of running for the nomination as Supreme Court Justice

Knowing “Slick Willy’s” penchant for cigs and internets, he should stick to his current role—being the husband of the secretary of state. Mr. Clinton is confused on what the meaning of the word “is” is, how are we to expect him to interpret the Constitution?

Reminder!

Agree with us? Disagree? Want to sound off?

We want your feedback.

Send your letter to the editor (collegian@csufresno.edu).
The letter must not exceed 250 words in length and must be accompanied by your full name, so we know who you are!

More than 800 fans filled the underground nightclub The Catalyst, in Santa Cruz, Calif. April 17 to watch French-pop band perform a live set.

**CONCERT REVIEW**

**Photo courtesy of Jeffrey M. Boos / Ultimate Phoenix Fan**

Generally, indie-rock shows lack unpredictability. Concert goers are typically treated to an overplayed sing-a-long, overpriced merchandise and “that guy,” who overkills the air drum.

But, after Saturday’s sold-out show at The Catalyst, in Santa Cruz, Calif., the French band Phoenix is anything but predictable.

Although the concert opened with the shoegaze-pop band Princeton, Phoenix proved that the French do indeed do it best.

Phoenix took its second set list to another level after frontman Thomas Mars sang every Phoenix fans’ favorite single “1901,” from the venue’s balcony, which housed a geographically diverse, 4/20 friendly audience.

Even the most skeptical listeners were lured toward the stage from the entrance as the ambient-pop piano tap of the track “Lisztomania,” kicked off the show.

The title of the song derives from the 19th Century German pianist Franz Liszt, an urbane artist who would bewitch women with his piano skills. As a result, the German romantic poet Christian Johann Heinrich Heine coined the term Lisztomania. The set list also included the nine alternate tracks from the band’s ‘90s inspired fourth album “Wolfgang Amadeus Phoenix.” As well as a few hits from their third album “It’s Never Been Like That.”

While Princeton passes through Fresno to open for the French band Camera Obscura at the Cellar Door Tuesday night, Phoenix entered Indigo, Calif. for the 2010 Coachella Valley Music and Arts Festival.

The Catalyst and the Outdoor Theatre were the band’s only California stops on the recently updated tour schedule.

It’s a shame that Starline, the Exit or even the Save Mart Center didn’t make the cut. Maybe next year Fresno.

The Collegian
Program to tour India, discuss art forms

By Tara Albert
The Collegian

Students will have a unique opportunity to learn about a country and one of its major art forms during next year’s winter break. The College of Art and Humanities is offering a tour of India from Dec. 27 to Jan. 12, 2011. Participants will visit various historical sites, interact with local artists and make their own art.

Joan K. Sharma is the associate professor in the art and design department and the co-director of the tour. She said the main focus of the tour will be Madhubani Art, one of the oldest painting forms in the world.

Madhubani paintings were traditionally done on walls and floors, but after a drought in the 1960s, artists started painting on paper to sell their artwork for supplemental income, Sharma said.

The program will feature a five-day workshop with artists from the Madhubani region, Sharma said. Santosh Das, a prominent Indian artist, will co-direct the art workshop with Sharma. He and other artists will present their work and discuss the techniques they use.

Tour participants will have the opportunity to try their hand at the painting style for the first three days of the workshop. During the remaining two days, students will have the opportunity to visit artists in their homes and watch them work.

Sharma said the workshop and the chance to see artists at work make the tour unlike other trips, where tourists only travel to and learn about important sites in an area.

“It’s a very unique trip,” Sharma said. “This is directly connected to a very old artistic tradition in the region.”

Travelers will also visit some important sites and buildings in India, such as the Taj Mahal and various religious temples, Sharma said.

Joan’s husband, Brijesh Sharma, will give tours at certain locations and teach participants about the important information of each destination.

“I will be giving a preview and the general history in the bus,” Brijesh said.

Participants will also have some free afternoons to explore the area on their own, Sharma said.

Sharma said most meals will be buffet style, with various types of food. Participants will have a range of choices, including Indian, Continental and Asian food.

Sky Sweet, an English teacher at Duncan Polytechnical High School, participated in a previous tour of India that the Sharmas led during the winter break of 2006-2007. She said it was a wonderful experience, and plans to attend the upcoming tour.

“It was absolutely fabulous,” Sweet said. “I loved the trip.”

Sweet said India is an unusual and overwhelming place.

“It’s not like any place you have ever been,” Sweet said. “It is an extraordinary country. The colors and the smells of the food are very dramatic.”

She said the Indian people were hospitable and welcoming.

“They really wanted you to enjoy their country,” Sweet said.

She said the Sharmas were fabulous tour guides, because they were knowledgeable about Indian history and culture.

“I don’t think I ever would have had this experience with other people,” Sweet said. “It was an amazing trip.”

Sweet said she always felt safe and had what she needed. “They really took care of us,” she said. “They made sure that we had everything we needed.”

Sweet said she highly recommends the tour, and students should jump on the opportunity to travel to India.

“I think everybody needs to go there at least once,” Sweet said.

Sweet suggested that participants be prepared to walk often and for long distances.

“You need a really good pair of walking shoes,” she said. “You do such an incredible amount of walking.”

Judy Lynn also attended the previous tour. She said India was unlike any other place she has traveled to.

“If you want to go to a country and you want something...
DIGITAL: 'No significant difference'

CONTINUED from page 1

remain concerned about the quality of online courses. Harding said. "They also perceive it as less effective than traditional classroom courses."

"There was a recent Department of Education publication about how hybrid classes are probably the most effective mode," Auernheimer said. "For a long time there's been a 'no significant difference' phenomenon that online and traditional classes are equally effective."

Harding agreed that Fresno State is ahead of the national curve in regards to online learning according to the 2008 Sloan-APLU national survey about online learning.

"Our campus was above average in the number of online courses developed and taught by faculty, and substantially higher than previous in faculty ratings of support for online teaching and learning," Harding said.

Auernheimer said cheating has increased as a greater problem for online classes.

"We haven't seen a lot of difference, although cheating takes different forms depending on delivery mode," Auernheimer said. "Faculty can choose to use plagiarism detection software, like Turnitin.com, that is integrat ed with Blackboard. Or faculty can have an in-person final exam."

Online courses can also be perceived as more cost-effective than traditional classrooms since more students can fit in one online class than a traditional classroom.

"That probably isn't true since online classes have faculty just like traditional classes do," Auernheimer said. "Higher education is a personnel-intensive business. There can be efficiencies and increased convenience by offering online classes, but I don't think you'll find a lot of cost savings."

Harding agreed that completing a lot of the technological tasks can end up raising the costs of instruction.

"There are ways to use technology to save money," Harding said. "At least in high-enrollment courses, they require off-loading, to technology or student assistants, some of the work currently done by faculty members. As Brent points out, the main cost of instruction is faculty time, and that's at least as true for online courses as for face-to-face courses."

In fall 2009, there were 155 fully online classes, eight hybrid and 3,343 traditional classes that had a Blackboard presence. This semester there were 123 fully online courses, one hybrid and 3,371 traditional classes with blackboard.

For the future of DC the plan is to upgrade to Blackboard version 9.1 over the summer.

beyond the landscape, the food and culture, India will give that to you," she said. Lynn said the opportunity to stay in the Madhubani area and learn about the art form will make the upcoming trip even better than the previous tour.

"That is going to be really good added feature to this tour," she said.

The weather in India can be very nice with most days reaching the mid-70s, Lynn said.

"It was very pleasant, and there was no humidity," she said.

Students will receive three units for the 109 India Tour class offered in the program. Sharma suggested that students talk to their advisors to figure out what course requirement the units would fulfill. Students will be graded on a 10-page paper that is due about a month after a student returns from the tour.

She said students should not hesitate to sign up for the trip, because this may be the only opportunity to learn about Madhubani Art in its place of origin.

"This particular trip may be a one-time trip," she said.

Tour participants do not have to be students in the art department to attend, and do not need any artistic ability. The program is meant to expose participants to an art form.

"It's more about learning about the tradition," Sharma said.

The trip costs $3,255, which includes round-trip flights, hotels, food, transportation in India, daily rations of bottled water, entrances into museums and more. Sharma said the fee does not include the travel insurance premium, tips for guides and drivers, and any personal expenses.

Sharma said people should sign up and make the advance deposit of $800 by May 15. The final balance and travel insurance premium will be due by Sept. 27.

The tour is open to the public and has room for 30 people to attend.

INDIA: Features a five-day workshop with Madhubani artists

Budget cuts nix faculty salary increases

The California State University (CSU) system announced Friday that negotiations for the 2008-09 salary increases with an in-state teaching unit have concluded. A neutral panel found that no General Salary Increases or across-the-board Service Salary Increases were possible with the current budget situation within the California Faculty Association. The CFA represents 23,000 faculty personnel at the CSUs 23 campuses.

The CSU had proposed to distribute about $1.7 million in unspent roll over funds, but the offer was rejected by the CFA, said Shirley Armbruster, the director of University Communications.

The administration and faculty union were unable to reach an agreement through mediation, but agreed to the neutral panel. Armbruster said. However, the panel’s findings are not binding, and can be rejected by either the administration of CFA.

The CSU’s general fund support has been cut by $625 million for the past two years, resulting in reduced enroll ment, two day per month furloughs of employees and increased student fees.

The Bulldogs battle back later in the weekend to split with Louisiana Tech in a four-game series.

By Megan Morales
The Collegian

The Fresno State baseball team overcame a tumultuous start to its four-game series this weekend against Louisiana Tech by salvaging a 2-2 split.

Neither team struggled with the bats, as they combined for a total of 69 runs in the series.

Fresno State lost the first two games, 13-6 and 13-5, only to turn it around and win the next two games 14-12.

The bulldogs were resilient, and were pleased to come back and win the final two games of the series.

We lost two quick ones at the beginning. Friday and the first game Saturday. But it felt good to come out last night and win, and then come back again on a Sunday when everyone is beat up and tired and finish what we needed to do,” first baseman Jordan Ribera said.

Ribera continued to produce at the plate, belting his 15th home run of the season and helping the bulldogs to a victory in the final game of the series.

“It was a good feeling,” Ribera said of his homerun. “More importantly it felt good to come out and win today.”

Coach Batesole attributes Ribera’s offensive success this season to his improved ability to hit outside pitches.

“You’ve seen how many balls he’s hit for extra base hits to the opposite field,” Batesole said. “He had a big double last night, homerun to the opposite field today and that’s the difference. You can always hit the ball as far as you want to on the pull side, but the problem is on game day they’re not going to give you any pitches when you’re as big and strong as he is.”

After the four-game series with Louisiana Tech, Fresno State is now 22-16 overall and 5-3 in conference play.

The weekend was also highlighted by leadoff hitter Danny Muno who drew eight walks in the four games, and surpassed the previous school record of 146 career walks. He now has 146 walks as a bulldog and leads the team with 31 this season.

The bulldogs had its best pitching performance in game four from Charlie Robertson. The sophomore pitcher recorded a career-high nine strikeouts and held the Louisiana Tech offense to only two runs in the 12-2 victory.

“I liked the way Charlie threw the ball,” Batesole said. “He had outstanding movement today. He was starting a lot of pitches out of the zone and bringing them back into the zone, and made some big pitches when he had to. He got in some trouble, and that’s what you like to see out of your starting pitchers, when they get in trouble they can get in and out of it and that was the key to the whole day.”

Up next, the bulldogs hit the road for a four-game series against the Nevada Wolf Pack April 23-25.

Basketball

With sophomore Paul George declaring early for the NBA Draft, head coach Steve Cleveland landed one of the best shooters in the nation, point guard Kevin Olekaibe from Las Vegas.

Olekaibe led the entire state of Nevada in scoring, averaging 36 points a game. He finished his senior season at Cimarron-Memorial High School as the nation’s No. 5 scorer Olekaibe leaves high school as the state’s second-leading scorer of all time.

Cleveland also signed small forward Bracken Funk. The 6-foot-8 Funk, led his high school team to three straight Utah state championships.

Women’s Tennis

vs. Louisiana Tech and Boise State

Final: 1-1 (4-0, 3-4)

The women’s tennis team started conference play on Saturday on a high note, sweeping Louisiana Tech, 4-0, but ended the last game of WAC play with a loss, losing to Boise State, 3-4.

Against Louisiana Tech, the doubles team swept the field. In singles play, the ‘Dogs won three matches. Singles players Laura Pole, Melissa McQueen and Renata Kucerkova each won for the ‘Dogs.

The ‘Dogs fell to Boise State in the final game of conference play. The teams split matches in singles play, but Boise State went on to capture the points in doubles play.

Freshmen Bianca Molod and Melissa McQueen each collected a win for the ‘Dogs in singles play.

The team finally comes home to host Cal Poly on April 24, for Senior Day.

Track & Field

@ Sacramento State Mondo Invitational

Senior Val-Pierre Dai Re picked up his second straight silver medal as in many weeks. Dai Re finished in second place, running 48.48 seconds in the 400 meter hurdles.

Freshman Jordan Smith, set a career-best, clearing six feet and four inches in the high jump. With his jump, Smith moved up to fifth place in the WAC.

Sophomore Latrishia Jordan finished in first place in the 600 meters, with a time of 1:34.38 seconds.

The track and field team will compete next at the Brutus Hamilton Invitational in Berkeley, Calif., before coming home to host the team’s only meet of the year, the Fresno State Duals.

Softball

The softball team will look to continue its dominance in WAC play when it hosts New Mexico State at Bulldog Stadium at April 23.

For Bulldogs, spring scrimmage means position battles

By Vongni Yang
The Collegian

For the first time this year, Bulldog Stadium was filled with players on the field and fans in the stands. The Fresno State football team held its first intrasquad scrimmage this past Saturday at Jim Sweeney Field.

Head football coach Pat Hill said he liked the intensity the team showed during the scrimmage.

"I like the way they were for the time this spring," Hill said. "I thought it was a good practice.

Position battles were evident, as many of the younger players seized the opportunity to make an impression on their coaches. There were a number of freshmen and sophomores trying to prove to coaches that they deserve playing time come fall.

"We got a lot of good young reps," Hill said. "That's what it's all about.

With the loss of last season's top pass-catcher, Seyi Ajirotutu, and senior receivers Marlon Moore, Darren Newborn and Chastin West, the 'Dogs are looking to fill the voids with younger players for the position.

Wide receiver Jameel Hamler emerged as a potential starter with his performance Saturday. The 6-foot-1, 205-pound junior grabbed two touchdown receptions during the scrimmage. He also displayed his athleticism, turning a short pass into a 57-yard catch and run.

As a reserve last season, Hamler finished second on the team with 37 receptions for 503 yards and five touchdowns. Hamler has been preparing all spring to fill in as a starting receiver.

"I'm playing as if I'm the starter," Hamler said. "Just because I want to go out there, get the ball and make plays.

Competing with Hamler are wide receivers Devon Wylie and Rashad Evans. Wylie has been a key contributor each of the past three seasons. However, he has missed several games to injuries every year as a Bulldog.

As a junior in 2009, the speedster hauled in 17 receptions for 259 yards and four touchdowns.

During the scrimmage, Wylie demonstrated his elusiveness and quickness throughout. He caught short passes and took two end-arounds for a first down.

"I like the play of Wylie," said receivers coach Keith Williams. "He's a big play guy and he made a big play today. We need him to make big plays on a consistent basis.

After redshirting last year, Evans will look to make an impact as a slot receiver for the 'Dogs. As a true freshman in 2008, the explosive Evans reeled in 21 catches for 232 yards.

Also competing for playing time this spring will be receivers A.J. Johnson, Matt Lindsey and J.J. Stallworth.

"I love the progress of the receivers," Williams said. "They're working hard on and off the field and in the classroom. Williams said, "They're watching enough film and they're studying the playbook. We just have to ring it onto the field and execute at a higher level."

The defensive backfield is also looking to plug in young players at core positions. Redshirt freshmen Erik Brown, J.B. Dock and L.J. Jones are each being asked to compete for playing time.

Jones possessed ball-hawking skills during Saturday's scrimmage, the cornerback broke up a few passes including an impressive pass deflection on a fade route in the corner of the end zone. Jones also displayed toughness, coming up to defend in run support.

"I think he's going to be a good player," Hill said of Jones. "I thought he played well against our starting receivers."
